Caution Regarding Forward Looking Statements

In this document and in other documents filed with Canadian regulatory authorities or in other communications, Laurentian Bank of Canada may from time to time make written or oral forward-looking statements within the meaning of applicable securities legislation. Forward-looking statements include, but are not limited to, statements regarding the Bank's business plan and financial objectives. The forward-looking statements contained in this document are used to assist the Bank's security holders and financial analysts in obtaining a better understanding of the Bank's financial position and the results of operations as at and for the periods ended on the dates presented and may not be appropriate for other purposes. Forward-looking statements typically use the conditional, as well as words such as prospects, believe, estimate, forecast, project, expect, anticipate, plan, may, should, could and would, or the negative of these terms, variations thereof or similar terminology.

By their very nature, forward-looking statements are based on assumptions and involve inherent risks and uncertainties, both general and specific in nature. It is therefore possible that the forecasts, projections and other forward-looking statements will not be achieved or will prove to be inaccurate. Although the Bank believes that the expectations reflected in these forward-looking statements are reasonable, it can give no assurance that these expectations will prove to have been correct.

The Bank cautions readers against placing undue reliance on forward-looking statements when making decisions, as the actual results could differ considerably from the opinions, plans, objectives, expectations, forecasts, estimates and intentions expressed in such forward-looking statements due to various material factors. Among other things, these factors include: changes in capital market conditions, changes in government monetary, fiscal and economic policies, changes in interest rates, inflation levels and general economic conditions, legislative and regulatory developments, changes in competition, modifications to credit ratings, scarcity of human resources, developments in the technological environment, the ability to realize the anticipated benefits from the purchase of an investment loan portfolio and the reaction of the seller's customers to the transaction, as well as, the ability to execute the Bank's transformation plan.

With respect to the proposed acquisition of the Canadian equipment financing and corporate financing activities of CIT Group Inc. ("CIT Canada"), the Bank also cautions readers regarding: the conditions in the acquisition agreement not being satisfied on a timely basis or at all, failure to receive regulatory approvals or other approvals on a timely basis or at all and changes in the terms of the proposed transaction that may need to be modified to satisfy such approvals or conditions

With respect to the anticipated benefits from the acquisition and statements with regards to this transaction being accretive to earnings, such factors also include, but are not limited to: synergies may not be realized in the time frame anticipated, the ability to promptly and effectively integrate the businesses, reputational risks and the reaction of the Bank's and CIT Canada's customers to the transaction, and diversion of management time on acquisition-related issues.

The Bank further cautions that the foregoing list of factors is not exhaustive. For more information on the risks, uncertainties and assumptions that would cause the Bank's actual results to differ from current expectations, please also refer to the Management's Discussion and Analysis under the title "Risk Appetite and Risk Management Framework" in the Bank's Annual Report, as well as to other public filings available at www.sedar.com.

The Bank does not undertake to update any forward-looking statements, whether oral or written, made by itself or on its behalf, except to the extent required by securities regulations.

NON-GAAP FINANCIAL MEASURES

The Bank uses both GAAP and certain non-GAAP measures to assess performance. Non-GAAP measures do not have any standardized meaning prescribed by GAAP and are unlikely to be comparable to any similar measures presented by other companies. These non-GAAP financial measures are considered useful to investors and analysts in obtaining a better understanding of the Bank's financial results and analyzing its growth and profit potential more effectively.
